Teamwork_godmark

Version 1 8/22/24

A copy of this file should be submitted by each student individually to the appropriate Canvas assignments drop. Change the netid above to your own

1. Team name: Odmark
2. Individual names and netids: Grace Odmark (godmark)
3. Link to github repository:
   https://github.com/grodmark/fa24-TOC-godmark_project02/tree/main
4. Checklist of files submitted on repository (enter names of files)
   a. Code files: traceTM_odmark.py
   b. Data files used for validation: abc_star.csv, a_plus.csv, equal01s.csv
   c. Data files used in timing runs: N/A
   d. Output files: output_a+_odmark.txt, output_abc*_odmark.txt, output_equal01s_odmark.txt
   e. Timing plots: N/A
   f. Readme_team: Readme_Odmark
   g. Any extra files: N/A
5. Approximate time spent personally on project (in hours): 4 hours
6. Lessons Learned: I learned about how to use recursive function to perform a DFS of all possible branches that can be taken in an NTM and that helped me understand how the "crystal ball" and non-determinism work.
7. Team Dynamics: This project was completed individually
8. Role of each team member: This project was completed individually
9. Anything extra
